

## Security Awareness Training Overview

### Training

- Consistent Security Awareness Training for all users
- Training content guided by the NIST Framework
- Targeted 10-minute courses are driven by behavioral psychology to improve your team's security
- Seamless, email-based access to courses, password-free
- Reminders delivered twice a month to users who've not completed their training

*Ensure that managers, systems administrators, and users of organizational systems are made aware of the security risks associated with their activities.*

**NIST 800-171 - Awareness & Training**

Hello Batman,

Wayne Enterprises & MSP have teamed up to provide you with training to keep you and Wayne Enterprises safe online.

In this short segment, we will focus on Phishing and Today's Cyber Attacks.

**Start Course**

Thank you for participating and doing your part to keep Wayne Enterprises secure!

Your friends,

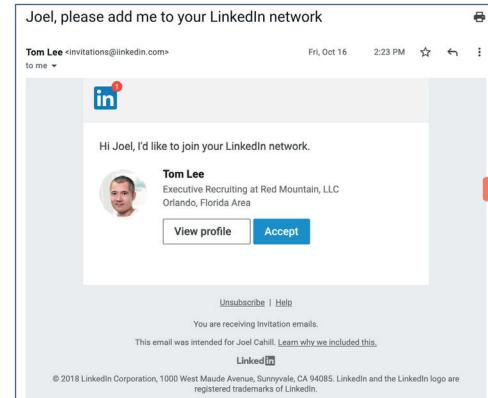

Wayne Enterprises and MSP

Example Training Notification

### Simulated Phishing

- Consistent Simulated Phishing Emails replicate the best attacks in the wild
- Every user is phished monthly, all with varied messages and timing
- Those who fall for the tests are immediately made aware they've been phished
- The next day, those users receive a reminder outlining how to avoid the attack in the future
- Also, these users automatically receive additional phishing emails to heighten awareness

Joel, please add me to your LinkedIn network

Example Simulated Phish

### Monthly Reporting

Monthly reports show your team's training progress and highlight areas of risk

### Cyber Security Training Policy

Program includes an Employee Cyber Security Training Policy that directly aligns with your team's training and allows you to demonstrate your security steps to regulators, vendors and clients

*Establish and maintain a security awareness program to influence behavior among the workforce to be security conscious and properly skilled to reduce cybersecurity risks to the enterprise.*
