

INFIMA Security | 2026 Security Awareness Training Course Catalog

Interactive Learning for the Modern Threat Landscape

ESSENTIALS

Phishing in the AI Age (8 min)

Attackers have upgraded—have you? This interactive course goes beyond the basics to prepare you for today's most sophisticated threats: AI-generated voices, deepfake video calls, and phishing that's impossible to spot by grammar alone. Through real-world scenarios and hands-on challenges, you'll learn to recognize attacks across every channel—email, text, voice, and social media—and know exactly what to do if you're compromised.

The Human Hack (7 min)

The best security system in the world has one weakness: you. This interactive course reveals how attackers exploit trust, authority, and urgency to bypass every technical safeguard. Through realistic scenarios, you'll experience pretexting calls, witness tailgating attempts, and learn to spot the psychological tricks that make smart people click, share, and comply. Walk away knowing not just what to watch for—but exactly how to respond without being rude or paranoid.

Data Has Consequences (6 min)

Transform how you think about information security. Learn to spot sensitive data, handle access requests properly, and respond decisively when something goes wrong. Through interactive scenarios, you'll master the skills to classify, protect, and safely dispose of data throughout its lifecycle.

Small Habits, Big Protection (5 min)

Build the daily security routines that prevent breaches without slowing you down. From morning login to end-of-day shutdown, learn simple habits around passwords, third-party apps, cloud services, and incident reporting that make a real difference.

INDUSTRY — Compliance

■ Safeguarding PHI (HIPAA)

What is Protected Health Information and why it matters to you. Learn the requirements for handling, storing, and transmitting PHI in compliance with HIPAA regulations.

■ Protecting Personal Information (PII)

Your identity is a target. Learn to recognize, classify, and protect Personally Identifiable Information. Covers sensitivity levels, regulatory requirements like GDPR and CCPA, access control principles, and what to do if a breach occurs.

■ Controlled Unclassified Information (CUI)

Understand the requirements for handling Controlled Unclassified Information. Learn to identify, mark, safeguard, and properly disseminate CUI in accordance with federal regulations.

■ GDPR: European Data Privacy Requirements (EU)

Learn the rules and regulations of the General Data Protection Regulation. Understand data subject rights, lawful processing, consent requirements, and your responsibilities when handling EU personal data.

■ PCI DSS: Payment Card Security Standards (Payment Cards)

Learn the rules and requirements for PCI DSS compliance. Understand how to properly handle, process, and store payment card data to protect your organization and customers.

■ ISO 42001: AI Management Systems (AI Governance)

Learn the fundamentals of ISO/IEC 42001:2023, the international standard for AI Management Systems (AIMS). Covers AI risk assessment, governance policies, data privacy, bias and fairness, AI security, and your role in maintaining responsible AI practices within your organization.

■ Phishing Awareness for K-12 Teachers (K-12)

Designed specifically for K-12 educators. Covers the phishing threats targeting schools today: fake Google Classroom notifications, parent impersonation, FERPA data theft, and AI-generated deepfakes of administrators. Through real-world school scenarios and hands-on challenges, you'll learn to protect your students, your credentials, and your district.

TOPICAL — Security Topics

■ Password Security

Master the fundamentals of password security. Covers password attacks, creating strong passwords, using password managers, multi-factor authentication, and how to respond when compromised.

■ Insider Threat Awareness

Learn to recognize and report insider threats. Covers negligent, malicious, and compromised insiders, warning signs to watch for, data protection principles, prevention strategies, and how to report concerns through proper channels.

■ Malware Awareness

Understand malware threats and how to defend against them. Covers types of malware, modern ransomware tactics, attack vectors, real-world case studies, prevention strategies, and incident response procedures.

■ Preventing Wire Transfer and Payment Fraud

Wire fraud is an effective and costly attack. Learn how to identify fraudulent wire transfer requests, verify payment changes, and keep your company safe from business email compromise and payment fraud schemes.

■ Security Beyond the Office

Working remotely introduces new security challenges. Covers network security, home office setup, device protection, video call safety, collaboration tools, cloud storage, AI privacy risks, and more. Learn to stay secure whether you're at home, in a coffee shop, or on the go.

■ The Data Guardian

Become a guardian of physical data and devices. Covers the complete document lifecycle, device security for laptops, USB drives, and mobile devices, BYOD risks, clean desk practices, and protecting data while traveling. Learn to be the last line of defense.

■ AI-Powered Threats & Deepfakes

Learn to recognize and defend against AI-generated threats including deepfake videos, voice cloning, AI-enhanced phishing, and synthetic misinformation. Protect yourself when seeing and hearing is no longer believing.

■ Safe AI Usage

Learn to use AI tools safely and responsibly. Covers data privacy, verifying AI outputs, avoiding shadow AI, understanding ownership, safe prompting techniques, and managing AI at the organizational level.

VIDEO — Core Security Series

■ Today's Cyber Attacks: A.I., Phishing and Staying Secure

Video training on identifying and avoiding phishing attacks, covering AI-generated threats, deepfakes, and modern social engineering techniques.

■ Social Engineering Attacks and A.I.

Video training on recognizing and defending against social engineering tactics and modern AI-powered attacks.

■ Device and Data Security

Video training on managing electronic data securely, proper data handling, and device security best practices.

■ Online and Digital Safety

Video training on safe web browsing, recognizing malicious URLs, and protecting yourself online.

HR — Workplace Safety

■ Sexual Harassment in the Workplace

Comprehensive training on recognizing, preventing, and responding to sexual harassment in the workplace. Covers legal definitions, reporting procedures, and creating a respectful work environment.

■ Bullying in the Workplace

Training on identifying and addressing workplace bullying. Learn to recognize bullying behaviors, understand their impact, and take appropriate steps to report and resolve incidents.

■ Violence in the Workplace

Training on recognizing warning signs of workplace violence, prevention strategies, and emergency response procedures. Learn how to maintain a safe work environment for everyone.

SPANISH — Cursos en Español

■ Phishing y ciberataques de hoy en día

Obtenga más información sobre los ataques de phishing y cómo prevenir el vector de ataque más popular.

■ Riesgos de la ingeniería social

La ingeniería social es una estrategia utilizada por los estafadores para manipular situaciones y engañarlo para que les proporcione información confidencial.

■ Asegurando los datos digitales y dispositivos

Los datos correctos en las manos equivocadas pueden ser catastróficos para usted y su empresa.

■ Uso seguro de la web

Internet es un lugar maravilloso para recopilar y compartir información. Desafortunadamente, también es un lugar perfecto para que los delincuentes se escondan.
